**SAFETY INSTRUCTIONS**

**IMPORTANT TO BE READ AND OBSERVED**

Before using the washing machine carefully read Health and Safety and Use and Care guides.
Keep these instructions close at hand for future reference.

**YOUR SAFETY AND THE SAFETY OF OTHERS IS VERY IMPORTANT.**

This manual and the washing machine itself provide important safety warnings, to be read and observed at all times.

This is the safety alert symbol. This symbol alerts you to potential hazards that can kill or hurt you and others.
All safety messages will follow the safety alert symbol or the word DANGER or WARNING. These words mean:

---

**DANGER**
Indicates a hazardous situation which, if not avoided, will cause serious injury.

**WARNING**
Indicates a hazardous situation which, if not avoided, could cause in serious injury.

All safety warnings give specific details of the potential risk presented and indicate how to reduce risk of injury, damage and electric shock resulting from improper use of the washing machine. Carefully observe the following instructions.
Failure to observe these instructions may lead to risks. The Manufacturer declines any liability for injury to persons or animals or damage to property if these advices and precautions are not respected.

Very young (0-3 years) and young children (3-8 years) shall be kept away unless continuously supervised.
Children from 8 years old and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge can use this washing machine only if they are supervised or have been given instructions on safe washing machine use and if they understand the hazards involved. Children shall not play with the washing machine. Cleaning and user maintenance shall not be made by children without supervision.

Remove the transport bolts. The washing machine is fitted with transport bolts to avoid any possible damage to the interior during transport. Before using the machine, it is imperative that the transport bolts are removed. After their removal, cover the openings with the 4 enclosed plastic caps.

Never open the door forcibly or use it as a step.

**INTENDED USE OF THE PRODUCT**

This washing machine is designed solely for domestic usage. To aim the washing machine as professional use is forbidden. The manufacturer declines all responsibility for inappropriate use or incorrect setting of the controls.

**CAUTION:** The washing machine is not intended to be operated by means of an external timer or separate remote control system.

Do not use the washing machine outdoors.
Do not store explosive or flammable substances such as aerosol cans and do not place or use gasoline or other flammable materials in or near the washing machine: a fire may break out if the washing machine is inadvertently switched on.
For models dedicated only for cold water: Do not connect to the hot water supply.
For models with hot fill: the hot water inlet temperature must not exceed 60 °C.

Make sure that the ventilation openings in the base of your washing machine (if available on your model) are not obstructed by a carpet or other material.

The supply water pressure must be in range 0.1 -1 MPa.

If you want to place a dryer on top of your washing machine, first contact our After-Sales Service or your specialist dealer to verify if this is possible. This is only admitted if the dryer is fixed on the washing machine by using an appropriate stacking kit available through our After-Sales Service or your specialist dealer.

**ELECTRICAL WARNINGS**

Make sure the voltage specified on the rating plate corresponds to that of your home.
For installation to comply with current safety regulations, an omnipolar switch with minimum contact gap of 3mm is required.
Regulation require that the washing machine is earthed.

For washing machines with fitted plug, if the plug is not suitable for you socket outlet, contact a qualified technician. Do not use extension leads, multiple sockets or adapters.
Do not connect the washing machine to a socket which can be operated by remote control. The power cable must be long enough for connecting the washing machine, once fitted in its housing, to the main power supply. Do not pull the power supply cable. If the power cable is damaged it must be replaced with an identical one. The power cable must only be replaced by a qualified technician in compliance with the manufacturer instruction and current safety regulations. Contact an authorized service centre.

Do not operate this washing machine if it has a damaged mains cord or plug, if it is not working properly, or if it has been damaged or dropped. Do not immerse the mains cord or plug in water. Keep the cord away from hot surfaces. The electrical components must not be accessible to the user after installation. Do not touch the washing machine with any wet part of the body and do not operate it when barefoot.

**ELECTRICAL CONNECTION FOR GREAT BRITAIN AND IRELAND ONLY**

**Fuse replacement**
If the mains lead of this washing machine is fitted with a BS 1363A 13amp fused plug, to change a fuse in this type of plug use an A.S.T.A. approved fuse to BS 1362 type and proceed as follows:

1. Remove the fuse cover (A) and fuse (B).
2. Fit replacement 13A fuse into fuse cover.
3. Refit both into plug.

**Important:**
The fuse cover must be refitted when changing a fuse and if the fuse cover is lost, the plug must not be used until a correct replacement is fitted. Correct replacement are identified by the colour insert or the colour embossed in words on the base of the plug. Replacement fuse covers are available from your local electrical store.

**Socket outlet/plug (valid for both countries)**
If the fitted plug is not suitable for your socket outlet, contact After-Sales Service for further instruction. Do not attempt to change the plug yourself. This procedure needs to be carried out by a qualified technician in compliance with the manufacturer’s instructions and current standard safety regulations.

**CORRECT USE**
Do not exceed the maximum load allowed. Check the maximum load allowed in the programme chart.

Turn off the tap when not in use.
Do not use any solvents (e.g. turpentine, benzene), detergents containing solvents, scouring powder, glass or general purpose cleaners, and flammable fluids; do not machine wash fabrics that have been treated with solvents or flammable liquids.

**CLEANING AND MAINTENANCE**
The washing machine must be disconnected from the power supply before carrying out any cleaning or maintenance operation.

Never use steam cleaning equipment.
SAFEGUARDING THE ENVIRONMENT

DISPOSING OF PACKAGING MATERIALS

The packaging material is 100% recyclable and is marked with the recycle symbol:

The various parts of the packaging must therefore be disposed of responsibility and in full compliance with local authority regulations governing waste disposal.

SCRAPING OF HOUSEHOLD APPLIANCES

When scrapping the washing machine, make it unusable by cutting off the power cable and removing the doors and shelves (if present) so that children cannot easily climb inside and become trapped. This washing machine is manufactured with recyclable or reusable materials. Dispose of it in accordance with local waste disposal regulations.

For further information on the treatment, recovery and recycling of household electrical appliances, contact your competent local authority, the collection service for household waste or the store where you purchase the washing machine.

This washing machine is marked in compliance with European Directive 2012/19/EU, Waste Electrical and Electronic Equipment (WEEE). By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product.

The symbol on the product or on the accompanying documentation indicates that it should not be treated as domestic waste but must be taken to an appropriate collection centre for the recycling of electrical and electronic equipment.
DECLARATION OF CONFORMITY

This washing machine has been designed, constructed and distributed in compliance with the safety requirements of European Directives:

- 2006/95/EC Low Voltage Directive
**PRODUCT DESCRIPTION**

**APPLIANCE**

1. Worktop  
2. Detergent dispenser  
3. Control panel  
4. Door handle  
5. Door  
6. Water filter / Emergency drain hose (if available) - behind plinth -  
7. Plinth (removable)  
8. Adjustable feet (4)

**DETERGENT DISPENSER**

1. Main wash compartment  
   - Detergent for the main wash  
   - Stain remover  
   - Water softener  
2. Prewash compartment  
   - Detergent for the prewash  
3. Softener compartment  
   - Fabric softener  
   - Liquid starch  
   Pour softener or starch solution only up to the “MAX” mark.  
4. Release button  
   (press to remove the detergent dispenser for cleaning)
**CONTROL PANEL**

1. On/Off button (Reset/Drain if long pressed)
2. Programme button
3. Colours 15° button
4. Fresh Care button
5. Dosing Aid button (Dosing Aid settings if long pressed)
6. Knob (Turn to select / Press to confirm)
7. Start delay button
8. Temperature button
9. Spin speed button
10. Options button (Key lock if long pressed)
11. Start/Pause button
12. Display
13. Programmes area

DOOR

To open the door, pull the handle

To close the door, hold the handle and push so that you can hear it click shut.

DRUM LIGHT (if available)

- During programme selection: the light goes on for laundry loading
- After programme start, the light fades on and off while the laundry load is detected.

- After programme end, when you open the door, the light goes on for a while for unloading the laundry. Then it goes off to save energy; touch any button to switch it on again.

ACCESSORIES

Contact our After-Sales Service to check if the following accessories are available for your washing machine (and dryer) model

PEDESTAL
Can be installed beneath your washing machine, to raise the appliance and allow for a more comfortable laundry loading and unloading.

STACKING KIT SHELF
by which your dryer can be fixed on top of your washing machine to save space and to facilitate loading and unloading your dryer in the higher position.
HOW TO USE THE APPLIANCE

FIRST TIME USE

If you plug in the washing machine, it will switch on automatically. To remove residues from manufacturing.

1. Select programme “Cotton” with temperature 95°C. Consider the instructions in paragraph “DAILY USE”.

2. Add a small amount of heavy duty detergent (maximum 1/3 of the quantity the detergent manufacturer recommends for lightly soiled laundry) to the main wash compartment of the detergent dispenser.

3. Start the programme without adding any laundry. See information on how to select and start a programme in paragraph “DAILY USE”.

Whirlpool
SENSING THE DIFFERENCE
DAILY USE

SORTING YOUR LAUNDRY

1. REMOVE ALL OBJECTS FROM POCKETS
   - Coins, pins etc. can damage your laundry as well as parts of the washing machine.
   - Objects like paper handkerchiefs will tear into small pieces which must be removed manually after the wash.

2. CLOSE ZIP FASTENERS, BUTTONS OR HOOKS. TIE LOOSE BELTS OR RIBBONS TOGETHER.
   - Wash small items (e.g. nylon stockings, belts etc.) and items with hooks (e.g. bras) in a laundry bag or pillow case with zip fastener. Always remove curtain rings, or wash curtains with the rings safely tied inside a cotton bag.

3. TYPE OF FABRIC / CARE LABEL SYMBOL
   - Cottons, mixed fibres, easy care / synthetics, wool, handwash items.
   - Colour
     - separate coloured and white items. Wash new coloured articles separately.
   - Size
     - Wash items of different sizes in the same wash load, to improve washing efficiency and distribution of the articles in the drum.
   - Delicates
     - Wash delicate items separately; they require gentle treatment.
HOW TO USE THE WASHING MACHINE

1. LOAD LAUNDRY
   - Open the door and load the laundry. Observe the maximum load sizes given in the programme chart.

2. CLOSE DOOR
   - Make sure that no laundry gets stuck between door glass and rubber seal.
   - Close the door so that you can hear it click shut.

3. OPEN WATER TAP
   - Make sure that the washing machine is connected to the mains.
   - Open the water tap.

4. SWITCH ON WASHING MACHINE
   - Press the On/Off button until the programme button lights up. An animation will appear, and there will be a sound. Afterwards the washing machine is ready to be operated.
   - The programme setting which you used last will appear on the control panel.

5. SET THE DESIRED PROGRAMME
   **GUIDED MODE**
   the button light will guide you through setting a programme in the following order: selection of programme / temperature / spin speed / options. As soon as you confirm a selection by pressing the knob, the button light will jump to the next step.

   **Select programme**
   Make sure that the programme button lights up.
   Turn the knob to select the desired programme.
   The indicator next to the selected programme lights up.
   Confirm the desired programme by pressing the knob.

Find more information regarding programmes in the Programme Chart.

**Change temperature, if needed**
If you want to change the temperature indicated on the display, make sure that the Temperature button « lights up.
Turn the knob to select the desired temperature, then press the knob to confirm.

**Change spin speed, if needed**
If you want to change the spin speed indicated on the display, make sure that the Spin button lights up.
Turn the knob to select the desired spin speed, or Rinse hold, then press the knob to confirm.

If you select spin speed “0”, the programme ends with draining the rinse water. No final spin cycle will be applied.
If you select “Rinse hold”, the programme will stop after the rinse phase. The laundry will remain immersed in the last rinse water. See more information in section PROGRAMMES, OPTIONS AND FUNCTIONS / Rinse hold.
Select options, if needed
If you want to select additional options, make sure that the options button lights up. The options which are selectable for your programme are indicated by lighting arrows. Turn the knob to select the desired options. The symbol of the selected option blinks. To confirm it, press the knob.

Some options / functions can be selected by directly pressing the button:

Correct dosing of detergent / additives is important, because
- it optimizes the cleaning result
- it avoids irritating residues of surplus detergent in your laundry
- it saves money by avoiding waste of surplus detergent
- it protects the washing machine by avoiding calcification of components
- it respects the environment by avoiding unnecessary environmental burden

7. START PROGRAMME
Press and hold Start/Pause until the button lights up solidly; the programme will start.
- If you have selected “Dosing Aid”, the washing machine will indicate the recommended detergent amount for your laundry load after programme start. – Add detergent to the main wash compartment of the detergent dispenser, close the dispenser and press “Start/Pause” to proceed with the programme
- If you have selected “Dosing Aid” and also “Prewash”, add the indicated detergent amount to the main wash compartment, and half of the indicated detergent amount also to the Prewash compartment.
- Close the detergent dispenser and press “Start/Pause” to proceed with the programme. To avoid overflow, do not open the detergent dispenser anymore.
- The remaining programme duration which is indicated on the display can vary. Factors like unbalance in the wash load, or foam formation, can have an effect on the programme duration. Whenever the remaining programme duration is calculated newly, an animation appears on the display.

INDIVIDUAL MODE
After you have switched on the washing machine, you are not forced to follow the GUIDED MODE. It is up to you which order you choose to set your programme. To do a setting, first press the relevant button, then turn the knob to select, and finally press the knob to confirm.
The range of temperatures, spin speeds and options depend on the programme selected. Therefore it is recommended to start your setting with selecting the programme.

6. ADD DETERGENT
- If you do not use the Dosing Aid function, pull out the detergent dispenser and add detergent (and additives/softener) now, as indicated in section DETERGENT DISPENSER. Observe the dosing recommendations on the detergent pack. If you have selected PREWASH or START DELAY, observe the instructions in section PROGRAMMES, OPTIONS AND FUNCTIONS. Afterwards carefully close the detergent dispenser again.
- If you use the “Dosing Aid” function, add detergent later, after you have started the programme. Refer to section DOSING AID/DAILY USE.
8. CHANGE THE SETTINGS OF A RUNNING PROGRAMME, IF NEEDED
It is possible to change the settings while a programme is running. The changes will be applied, provided the respective programme phase has not finished yet.

• Press the relevant button (for example the “Spin speed” button to change the spin speed). The selected value blinks for a few seconds.
• While blinking, you can adjust the setting by turning the knob. If the value stopped blinking and you have not yet done the desired modification, press the button again.

• Press the knob to confirm the modification. If you do not confirm, the modification will be confirmed automatically – the modified setting will stop blinking.

The programme will proceed automatically after you have changed the setting. To prevent that a running programme is changed by accident (for instance by children), use the “Key lock” (see paragraph PROGRAMMES, OPTIONS AND FUNCTIONS).

To change the settings of a running programme, you can also
• Press “Start/Pause” to put the running programme on pause
• Change your settings
• Press “Start/Pause” again to continue the programme.

If you have changed the programme, do not add detergent for the new programme.

9. PAUSE A RUNNING PROGRAMME AND OPEN THE DOOR, IF NEEDED
Press “Start/Pause” to interrupt a running programme
• Provided water level or temperature is not too high, the “door open” indicator lights up. You can open the door, for example to add more laundry, or to remove laundry which was loaded by mistake.
• Press “Start/Pause” to proceed with the programme

10. RESET A RUNNING PROGRAMME, IF NEEDED
• Press and hold the On/Off button until the display shows “rES”. The water drains and the programme is ended. The door unlocks.

11. SWITCH OFF THE WASHING MACHINE AFTER PROGRAMME END
• „End“ will appear on the display, and the Door open indicator will light up – you can take out your laundry

• Press “On/Off” to switch off the washing machine. If you do not switch it off, the washing machine will switch off automatically after a quarter of an hour after programme end, to save energy.
• Leave the door ajar, so that the inside of the washing machine can dry.
### PROGRAMMES AND OPTIONS

For selecting the appropriate programme for your kind of laundry, always respect the instructions on the care labels of the laundry.

OPTIONS SELECTABLE BY THE OPTIONS BUTTON

The programme chart gives an overview of possible combinations of programmes and options. Not all combinations of programmes and options are selectable. Also certain options are not combinable. In this case, the indicator of the non-combinable option blinks and switches off again, and a signal sounds.

PREWASH

Helps to clean heavily soiled laundry by adding a prewash phase to the wash programme selected. For heavily soiled laundry, for example containing sand or granular dirt. Shake out the laundry thoroughly before loading it into the washing machine. Prolongs the programme by about 20 minutes.

Add detergent also to the prewash compartment of the detergent dispenser, or directly into the drum.
– When selecting “Prewash”, use powder detergent for the main wash, to ensure that the detergent stays in the detergent dispenser until start of the main wash phase. Respect the detergent manufacturer’s dosing recommendations, or use the “Dosing Aid” option.

HOT FINISH

The programme ends with a warm rinse phase. Relaxes the fibres of your laundry. The laundry feels comfortably warm when taking it out a short time after programme end.

BIO STAINS 15°

Helps to remove all kinds of stains, except grease / oil.

The programme begins with a cold water wash phase.

Duration is prolonged by about 10 minutes.
Pre-treatment recommended for obstinate stains.
Not selectable for Cotton 95°C.
<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
<th>Additional Information</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>HEAVY SOIL</strong></td>
<td>Helps to clean heavily soiled, stained laundry by optimizing the efficiency of additives for stain removal.</td>
<td>Add an appropriate amount of in-wash additive for stain removal (powder) to the main wash compartment, together with your detergent. Only use powder detergent with this option. Respect the manufacturer’s dosing instructions. Can prolong the programme by up to 15 minutes. <em>Important</em>: Appropriate for use of stain removers and bleaches on oxygen basis. <strong>Chlorine or perborate bleaches must not be used!</strong></td>
</tr>
<tr>
<td><strong>INTENSIVE RINSE</strong></td>
<td>Helps to avoid detergent residues in the laundry by a prolonged rinse phase.</td>
<td>Particularly suitable for washing baby laundry, for people suffering from allergies and for areas with soft water.</td>
</tr>
<tr>
<td><strong>RAPID</strong></td>
<td>Enables quicker washing. Shortens the programme duration while keeping a good wash result.</td>
<td>Recommendable for only lightly soiled laundry. Not selectable for Cotton 95 °C.</td>
</tr>
</tbody>
</table>
COLOURS 15°

Helps to preserve the colours of your laundry by washing it with cold water (15°C). Saves energy for water heating, while keeping a good wash result.

Suitable for lightly soiled coloured laundry without stains.

Make sure that your detergent can be used with cold wash temperatures (15 or 20 °C).

Not selectable for Cotton 95°C.

FRESH CARE

Helps to keep your laundry fresh if you cannot unload it soon after programme end.

The washing machine starts to tumble the laundry periodically a few minutes after programme end. This tumbling will last up to approximately 6 hours after end of your wash programme. You can stop it at any time by pressing any button; the door unlocks and you can take out your laundry.

TEMPERATURE

If you switch on the washing machine, the last used programme and temperature setting appears on the control panel.

If you change the programme, the default temperature of the selected programme appears on the display.

If you want to change the temperature, press the temperature button, turn the knob to select the desired temperature and confirm it by pressing the knob.
RINSE HOLD

To avoid automatic spinning of the laundry at the end of the programme. The laundry remains in the last rinse water, the programme does not proceed.

Suitable for delicate laundry which is not appropriate for spinning, or which should be spun with a lower spin speed.

Not appropriate for silk.

To terminate the “Rinse hold”, choose between:

• draining the water, no spinning: turn the knob to select spin speed “0”, then press “Start/Pause”: the water will be drained and the programme ended

• spinning the laundry: the default spin speed blinks - start the spin cycle by pressing “Start/Pause”. Or select a different spin speed by turning the knob, press it to confirm the selected spin speed, and press Start/Pause to start the spin cycle

SPIN

If you switch on the washing machine, the last used programme and spin speed setting will appear on the control panel.

If you change the programme, the default spin speed of the selected programme will appear on the display.

If you want to change the spin speed, press the Spin button, turn the knob to select the desired spin speed and press the knob to confirm. If you select spin speed “0”, the rinse water will be drained at the end of the programme, and there will be no final spin cycle.
# FUNCTIONS

## ON/OFF

<table>
<thead>
<tr>
<th>Button</th>

</tr>
</tbody>
</table>

## KNOB

- To select and confirm programmes and options
- Turn to select
- Push to confirm

## START/PAUSE

- To start the programme, after you have finished your settings
- To pause a running programme
- To continue a paused programme

## KEY LOCK

This function allows you to lock the buttons and the knob of the control panel against unwanted operation, for example by small children.

The washing machine must be switched on.

1. Press and hold the option button; until the key symbol on the control panel lights.
2. Knob and buttons are locked now.

The only working function is “On/Off” to switch the washing machine off. The key lock remains active also if you switch off and on again the washing machine.

1. To unlock the buttons/knob, press and hold the option button again until the key symbol goes off.
DOSSING AID

Helps to dose the right amount of detergent for your laundry load.

Before using this option:

The concentration of detergents available on the market differs considerably. For that reason, adapt the washing machine to the dosing amounts of the detergents which you use. Furthermore, check if the washing machine’s preset water hardness level (soft) corresponds to your local water hardness level – if not adapt it (see “DOSSING AID / FIRST USE”).

See separate section Dosing Aid – First use / Daily use

START DELAY

Moves the start of your programme to a later time. Helps to profit from more favourable energy rates (e.g. during the night), or to have the laundry ready at a certain time.

Choose a delay up to 23 hours. Do not use liquid detergent with this function, to ensure that the detergent stays in the detergent dispenser until programme start.

- Select programme, temperature and options.
- Press the “Start delay” button – the start delay symbol on the display blinks.
- Turn the knob to select a delay up to 23 hours, which will be shown on the display. Confirm the desired delay by pressing the knob. The start delay symbol on the display lights up solidly.

Press Start / Pause - the display shows the countdown of the delay until start of the programme. The Start/Pause button lights up. The colon between hours and minutes on the display blinks. The door locks.

- If you have selected Dosing Aid, the washing machine will calculate the recommended detergent amount after you have pressed Start/ Pause. Add the detergent amount indicated on the display into the detergent dispenser; use powder detergent, to make sure that the detergent stays in the dispenser until start of the programme. Close the dispenser and press Start/Pause again, to start the countdown of the selected delay.
- After the delay has expired, the washing machine starts automatically. The display then indicates the remaining programme duration.

To cancel the delay:
- press Start/Pause to cancel the start delay (and press “Start/Pause” again to start the selected programme immediately, if desired)
- or press and hold On/Off to cancel the complete programme setting.
INDICATORS

DOOR CAN BE OPENED

This indicator lights

• before you have started a programme

• when you have paused a programme and the water level is not too high, or the laundry is not too hot in that programme phase

• when a programme is finished and the laundry can be unloaded

FAILURE: SERVICE

FAILURE: WATER FILTER CLOGGED

See section TROUBLESHOOTING for more information

FAILURE: WATER TAP CLOSED
SAVE THE DOSING VALUES FOR THE DETERGENTS YOU USE

Detergent types: | Colour | Delicate | Generic
---|---|---|---
Programmes: | Colours | Wool, Delicates | All other programmes

Check on the packs of your detergents the dosing amount for medium soil level and medium water hardness.
To save these values in the washing machine:

1. Select the programme for which you want to save the detergent value.

2. Press and hold the Dosing Aid button until the bottle symbol on the display lights up. The indicators of all programmes for the detergent group light up.

3. Turn the knob to adjust the dosing value to the one you have identified before on the detergent pack. Afterwards confirm it by pressing the knob.

4. Do this procedure for all three programme groups. It is enough if you save the dosing value for one programme per group – it will then be automatically saved for all other programmes of this group.

To return to the factory settings: select and confirm “rES” as described in step 3.

**ADAPT THE WASHING MACHINE TO YOUR LOCAL WATER HARDNESS**

The washing machine comes with preset water hardness level soft.

1. Press and hold the Programme button and the Dosing Aid button simultaneously.

   “1” appears on the display, which means water level “soft”.

2. Turn the knob to adjust the water level to.

   2 = Medium
   3 = Hard

   and press the knob to confirm. As soon as you confirm the water hardness setting, you automatically exit the water hardness setting mode.

Check your regional water hardness level, for example by consulting your local authorities or via internet. – If your local water hardness is not “soft”, adjust the washing machine as follows: To adjust the water hardness:

1. Select the programme for which you want to save the detergent value.

2. Press and hold the Dosing Aid button until the bottle symbol on the display lights up. The indicators of all programmes for the detergent group light up.

3. Turn the knob to adjust the dosing value to the one you have identified before on the detergent pack. Afterwards confirm it by pressing the knob.

4. Do this procedure for all three programme groups. It is enough if you save the dosing value for one programme per group – it will then be automatically saved for all other programmes of this group.

   To return to the factory settings: select and confirm “rES” as described in step 3.
1. After you have selected programme and options, press the “Dosing Aid” button; the Dosing aid symbol lights up on the display.

2. Then start the programme by pressing “Start/Pause”. – The drum rotates to detect the laundry load, while the display shows an animation. Afterwards the display indicates the recommended detergent amount in ml.

3. Pull out the detergent dispenser and pour the detergent quantity which is indicated on the display into the main wash compartment of the detergent dispenser.

If you have selected “Prewash” option and you want to add detergent also for the prewash, pour half of the indicated detergent amount into the prewash compartment, in addition to the full amount which you have already added to the main wash compartment.

Instead of adding detergent to the detergent dispenser, it can also be added directly to the drum, in a detergent ball.

For programmes with prewash: prewash detergent can be added to the drum, main wash detergent must be added to the main wash compartment of the detergent dispenser. Use powder detergent for the main wash in this case, to ensure that it stays in the detergent dispenser until start of the main wash phase.

After having added detergent, close the detergent dispenser (or door).

4. Close the detergent dispenser (or the door) and press “Start/Pause” to continue the programme.
SAVING TIPS

Achieve the best use of energy, water, detergent and time by using the recommended maximum load size for the programmes, as indicated in the programme chart.

Do not exceed the detergent dosages indicated in the detergents manufacturer’s instructions. Use the Dosing Aid function; prepare this function as indicated in “DOSING AID / FIRST USE”.

Use “Prewash” for heavily soiled laundry only.

Pretreat stains with stain remover, or soak dried in stains in water before washing, to reduce the necessity of a hot wash programme.

Save energy by using a 60° C instead of a 95° C wash programme, or a 40° C instead of a 60° C wash programme. For cotton laundry, prefer using programme Eco Cotton with 40°C or 60°C.

Save energy and time by selecting a high spin speed to reduce the water content in the laundry before using a tumble dryer.

Use option “Colours 15°” for lightly soiled laundry, to save energy for water heating.
CLEANING & MAINTENANCE

![Warning]

**WARNING**

For any cleaning and maintenance, switch off and unplug the washing machine. Do not use flammable fluids to clean the washing machine.

CLEANING THE OUTSIDE OF THE WASHING MACHINE

Use a soft damp cloth to clean the outer parts of the washing machine.

Do not use glass or general purpose cleaners, scouring powder or similar to clean the control panel – these substances might damage the printing.
CHECKING THE WATER SUPPLY HOSE

Check the inlet hose regularly for brittleness and cracks. If damaged, replace it by a new hose available through our After-Sales Service or your specialist dealer.

Depending on the hose type:

If the inlet hose has a transparent coating, periodically check if the colour intensifies locally. If yes, the hose may have a leak and should be replaced.

For water stop hoses: check the small safety valve inspection window (see arrow). If it is red, the water stop function was triggered, and the hose must be replaced by a new one. For unscrewing this hose, press the release button (if available) while unscrewing the hose.
CLEANING THE MESH FILTERS IN THE WATER SUPPLY HOSE

1. Close water tap and screw off the inlet hose.

2. Clean the mesh filter at the hose’s end carefully with a fine brush.

3. Now unscrew the inlet hose on the back of the washing machine by hand. Pull out the mesh filter from the valve on the back of the washing machine with pliers and carefully clean it.

4. Insert the mesh filter again. Connect the inlet hose to water tap and washing machine again. Do not use a tool to connect the inlet hose. Open the water tap and check that all connections are tight.
CLEANING THE DETERGENT DISPENSER

1. Remove the detergent dispenser by pressing on the release button and at the same time pulling out the detergent dispenser.

2. Remove the insert from the detergent dispenser, as well as the insert of the softener compartment.

3. Clean all parts under running water, removing all detergent or softener residues.

4. Wipe the parts dry with a soft cloth.

5. Reinstall the detergent dispenser and push it back into the detergent compartment.
CLEANING THE WATER FILTER / DRAINING RESIDUAL WATER

**WARNING**
Switch off and unplug the washing machine before cleaning the water filter or draining residual water. If you used a hot wash programme, wait until the water has cooled down before draining any water.

If the water cannot drain, the “Water filter clogged” failure indicator lights up. Clean the water filter regularly, to avoid that the water cannot drain after the wash due to clogging of the water filter.

1. Remove the plinth: Push the tabs left and right to release the plinth and remove it.

2. Container for drain water:
   If your washing machine model has an emergency drain hose:
   Provide a flat container for the drain water. Remove the emergency drain hose from the base of the washing machine.

3. Drain the water:
   If your washing machine model has an emergency drain hose:
   Remove the stopper at the end of the hose and let the water flow into the container. When the container is full with water, plug the stopper to the hose end and empty the container. Repeat this procedure until no more water flows out. Afterwards firmly close the emergency drain hose with the stopper and reinsert the hose in the washing machine’s base.
If your washing machine model has no emergency drain hose:
Slowly turn the filter counterclockwise until water flows out. Let the water flow out, without removing the filter.
When the container is full, close the water filter by turning it in clockwise. Empty the container. Repeat this procedure until all the water has drained.

4. Remove filter: Lay a cotton cloth beneath the water filter, which can absorb a small amount of rest water. Then remove the water filter by turning it out anticlockwise.

5. Clean the water filter: remove residues in the filter and clean it under running water.

6. Insert the water filter and reinstall the plinth: Reinsert the water filter again by turning it in clockwise direction. Make sure to turn it in as far as it goes; the filter handle must be in vertical position. To test water tightness of the water filter, you can pour about 1 liter of water into the detergent dispenser. Then reinstall the plinth.
TRANSPORT AND HANDLING

Unplug the washing machine and close the water tap.

1. Make sure that door and detergent dispenser are properly closed.

2. Disconnect the inlet hose from the water tap, and remove the drain hose from your draining point. Remove all rest water from the hoses, and fix them so that they cannot get damaged during transport.

3. Refit the transport bolts. Follow the instructions for removing the transport bolts in the Installation Guide in reverse order.

*Important:* Do not transport the washing machine without having fixed the transport bolts.
Your washing machine is equipped with various automatic safety functions. These enable failures to be detected in good time and the safety system can react appropriately.

These failures are frequently so minor that they can be removed within a few minutes.

</table>
DOOR – HOW TO OPEN IT IN CASE OF A FAILURE, TO TAKE OUT YOUR LAUNDRY (if feature is available)

Before opening the door as described in below section, refer to failure “Door is locked with or without failure indication, and the programme does not run”. The door may unlock by itself after conditions like for example a power breakdown do not persist anymore.

If you want to take out your laundry immediately, first try to unlock the door as described in FAILURE INDICATORS AND MESSAGES (FdL or F29). Only if the door cannot be opened as described in the section mentioned before, proceed as described below.

In case of a power breakdown, the washing machine will proceed where it was interrupted as soon as power is available again.

If a failure occurs on the washing machine and the door is locked, but you must take out your laundry:

1. First drain the residual water, as described in section “Draining residual water”
2. Remove the screw with a screwdriver.
3. Then pull downwards the strap marked with “Door open”. You can now open the door and take out your laundry.
4. Afterwards fix the strap again by firmly turning in the screw with the screwdriver.
5. Reinstall the plinth

Switch off the washing machine and unplug it. Close the water tap. Wait until the drum has stopped rotating. Never open the door while the drum is in motion. Wait until water and laundry have cooled down when washing with high temperatures.

Always drain the water before opening the door, either by pressing and holding On/Off until “rES” appears on the display, or by doing it manually as described in section DRAINING RESIDUAL WATER.

Wait until the drum has stopped rotating. Wait until water and laundry have cooled down when washing with high temperatures.
AFTER-SALES SERVICE

BEFORE CALLING THE AFTER SALES SERVICE

1. Check if you can solve the problem yourself by consulting section TROUBLESHOOTING GUIDE.

2. Switch the washing machine off and on again to see if the failure persists.

IF AFTERWARDS THE FAILURE STILL OCCURS, CONTACT THE AFTER SALES SERVICE

Call the number shown on the warranty booklet, or follow the instructions on website www.whirlpool.eu

Always indicate
- A brief description of the failure
- Washing machine model (see rating plate inside door)
- Service number (on service sticker inside door; number after “Service”)
- Your full address and telephone number.

For any repairs, use our authorized After Sales Service, to ensure proper repairing and use of original spare parts.
