BEFORE USING THE APPLIANCE FOR THE FIRST TIME CAREFULLY READ THIS QUICK REFERENCE GUIDE AND THE ASSEMBLY INSTRUCTIONS!

FOR ENERGY SAVING THE CONTROL PANEL DEACTIVATES AUTOMATICALLY AFTER 30 SECONDS IF NO CYCLE HAS STARTED.

- **ECO PROGRAM INDICATOR**: When lit, it indicates that standard program is active.
- **WASH TIME DISPLAY**: Indicates the cycle duration and the remaining time (h:min). With “Delayed start” selected it indicates the time remaining until program start: “h124” if above 10 hours delay time remain and “h:mm” if below 10 hours delay time remain. If “Fx Ey” messages appears on the display, see page 8 - chapter “What to do if….”
- **DELAY INDICATOR**: When lit, it indicates that delay is active.
- **SALT INDICATOR**: When lit (at the end of the cycle), the salt reservoir needs to be refilled.
- **RINSE AID INDICATOR**: When lit (at the end of the cycle), the rinse aid dispenser needs to be refilled.
- **MULTIZONE INDICATOR**: When lit, it indicates the wash in the upper or lower rack only.
- **KEYBOARD LOCK INDICATOR**: When lit, it indicates that keyboard lock is active.

**PROGRAM SELECTION BUTTON**
- Push “P” button (repeatedly) until selected program number is shown on the display (P1...Px) - see “Table of programs” - next page.
- After 3 seconds the cycle remaining time is displayed.

**MULTIZONE**
- Allows you to choose the washing zones.
- The appliance washes both racks by default (indicators are not lit).
- To wash only in specific rack, press this button repeatedly:
  - only upper rack indicator lit
  - only lower rack indicator lit

**KEYBOARD LOCK**
- This option allows you to lock the buttons on the control panel.
- Children will not be able to accidentally start the dishwasher by pressing the buttons on the control panel when this option is selected.
- If you want to activate this option hold down the button for 3 seconds.
- Repeat the same operation to unlock the panel.

**ANTIBACTERIAL RINSE**
- This function activates an antibacterial rinse at the end of the wash cycle, guaranteeing a further reduction of bacteria.
- Press the button to activate or deactivate the function.
- This function can be used with the programs indicated in the table of programs.
- The dishwasher door must be kept shut for the entire duration of the program in order to guarantee reduction of bacteria. If the door is opened the indicator lamp starts flashing.

**POWERCLEAN®**
- Thanks to the additional power jets this option provides a more intensive and powerful wash in the lower rack, in the specific area.

**TABLET SETTING**
- This setting allows to optimize the cycle performance according the type of detergent used.
- Push the Tablet button (the indicator lights up) if you are using the combined detergents in tablet.
- If you are using powder or gel detergent, the Tablet indicator on the control panel has to be off.

**DELAYED START BUTTON**
- Push this button (repeatedly) to delay the start of the program. Adjustable from 0:30 to 24 hours.
- With each press of the button, the delay start increases by: 0:30 if selection below 4 hours, 1:00 if selection is below 12 hours, 4 hours if selection is above 12 hours.
- If 24 hours reached, and the button is pressed, the delayed start is deactivated - “OFF” message is shown.
- Press Start button or open the door during washing cycle to pause the cycle - the Start Indicator blinks.
- To resume the cycle push Start button and close the door.

**CANCEL/OFF BUTTON**
- This button to switch off the control panel.
- In case of a power failure all cycles or settings will be canceled.
- If pressed for 3 seconds when a program is running it cancels this program.

**START/PAUSE/RESUME BUTTON**
- Push this button to start the selected program: the indicator lights up and goes off at the end of the program.
- Press Start button or open the door during washing cycle to pause the cycle - the Start Indicator blinks.

**WATER TAP CLOSED - Alarm**
- Blinks when there is no inlet water or water tap is closed.

1) Program data obtained under normal conditions and with default options on. Data may vary depending on ambient conditions and used options. Differences of up to 20 minutes are possible with sensor programs as a result of the appliance’s automatic calibration system.

2) Reference program for energy label in compliance with EN 50242 regulations. - Note for Testing Institutes: for detailed information on the EN/Standard loading comparison test and other tests, contact the following address: “contact@whirlpool.com”.

Power consumption in: Left-on mode: 1.08 W / Off-mode: 0.40 W.
How to set water hardness in order to always assure the best cleaning results

Water hardness should be set before the first wash or if water hardness has been changed

- Press and hold together Program and buttons for minimum 3 seconds.
- The current water hardness setting will be visible on the display.
- Press the Program button to increase setting. Value range goes from 1 to 7 (when the level reaches 7, the next press of the start button will set the level back to 1).
- Wait 30 seconds (control panel switches off) or press Start/Pause button to save setting.

Filling the salt reservoir - Dissolve limescale (not necessary if water hardness level is set to “soft 1”!)

Visual indicator (depending on the model). Unscrew cap.

Fill the salt reservoir with water before the first wash only.

Add salt (never add detergent!) min. 0.8 kg/max. 1 kg

Once regeneration salt is added, immediately start a wash program (the “Pre-wash” program alone is not sufficient). Residual saline solution or grains of salt can lead to deep-down corrosion, irreparably damaging the stainless steel components. The guarantee is not applicable if faults are caused by such circumstances.

4. Wait 30 seconds (control panel switches off) or press Start/Pause button to save setting.

Detergents

When powder or gel detergent is used, regeneration salt must be added and water hardness level must be set as indicated in the table on the right.

Also, when tablets which include salt functionality are used, regeneration salt still must be added.

Water hardness level is factory set for medium-hard water (level 4).

Adding rinse aid (not necessary when you use tablets). How to adjust the rinse aid dosage regulator

**Daily check**

**2**

Visual indicator

If required, open the cover B (press the dedicated button).

Add rinse aid to the max. line ~150 ml

The rinse aid dosage can be adjusted to the detergent used. The lower the setting, the less rinse aid is dispensed (factory setting: position 4). Press the button to open the cover B. Using a coin or similar object, turn the arrow to the desired setting. After adjusting the rinse aid setting, shut the cover again.

**Daily use**

**3**

Check the rinse aid indicator to check the level into the dispenser.

Check the rinse aid indicator to check the level into the dispenser.

**Table:**

<table>
<thead>
<tr>
<th>Rinse aid indicator on the control panel</th>
<th>Rinse aid indicator on the dispenser</th>
</tr>
</thead>
<tbody>
<tr>
<td>[ ] dark: OK.</td>
<td>[ ] clear: NEEDS TO BE ADDED</td>
</tr>
</tbody>
</table>

Check the rinse aid indicator to check the level into the dispenser.

Check the rinse aid indicator to check the level into the dispenser.

Check the rinse aid indicator to check the level into the dispenser.

**Safety warning:**

Only use rinse aids recommended for use in domestic dishwashers. Immediately wipe away any rinse aid spilt accidentally. This prevents the formation of excess suds which can cause a fault function of the appliance.

**Tip:**

If there are streaks: reduce the dosage by turning the dial to a lower setting (1-3). If crockery is not perfectly dry: increase the dosage by turning the dial to a higher setting (5-6). Plastic dishes have more difficulty drying and a higher rinse aid setting will not improve the situation.

**Tip:**

Detergents with rinse aid incorporated may be effective only with longer programs. In the case of shorter programs, detergent residue may be a problem (if necessary, use powder detergent). Detergents with rinse aid incorporated tend to form excess suds.

**Adding detergent - Use only detergent specifically for dishwashers in accordance with the supplier’s recommendations**

Insert detergent: Tablet / powder / gel into the big chamber.

Please look for the recommendation of the detergent manufacturer on the packaging of the detergent product.

Use only one tablet per one cycle, only placed in detergent dispenser.

Some types of tablets may not dissolve completely during the short cycles (Fragile, Rapid, Handwash); placing the tablet on the tub bottom can help dissolving and washing.

Open the cover A (press the dedicated button).

Only fill the detergent dispenser prior to starting a wash program.

Shut the cover by pressing dedicated ribs.

**Tips**

- Use only one tablet per one cycle, only placed in detergent dispenser.
- Some types of tablets may not dissolve completely during the short cycles (Fragile, Rapid, Handwash); placing the tablet on the tub bottom can help dissolving and washing.

**Notes**

- Use only detergent specifically for dishwashers in accordance with the supplier’s recommendations.
- Only fill the detergent dispenser prior to starting a wash program.
- Shut the cover by pressing dedicated ribs.
How to load the racks

A - Adjustable flaps (2 or 4): In horizontal position for cups / long utensils / steamed glasses.

B - Cutlery basket: Can be placed in the upper rack when the “Half load/Multizone” option is selected. The Grid (F) should be removed.

How to adjust upper rack height (if available) - it could be useful to lift up upper rack to have more space in lower rack bring it down to load long stem glasses.
- Grasp and take out the two lateral handles (C) (they must be on the same level) and lift up or take down the upper rack.

How to remove upper rack (if available) - It could be useful to remove upper rack to load bulky items in lower rack.
- Open the two retainers (D) to take off the rack. When the upper rack is in place the retainers must always be closed.
How to load the racks

**4**

- **E - Cutlery basket**
- **F - Grid:** Helps to keep the cutlery separate for better washing results.
- **G - Vertical plate holders:** They can be folded down to load pots.
- **H - Lateral support with foldable flaps** (if available):
  Shelves can be used to hold long tools or cups onto.

Arrangement of crockery so that water does not collect in cavities, ensuring that the spray arms turn freely. Only use dishwasher-proof crockery and dishes.

Do not use the dishwasher for washing wooden items, aluminium, tin, silver cutlery or decorated crockery (unglazed). In the baskets, dishes (e.g., plates, bowls, pots) must be placed in a correct way to let water flow down!

---

**How to use PowerClean®**

1. Adjust the PowerClean® area (G) folding down the rear plate holders to load pots.
2. Load pots and casseroles inclined vertically in PowerClean® area. **Pots have to be inclined towards the power water jets.**

---

**5**

**Switching on the appliance.** Press any button to switch on the control panel and start programming.
Select program

Overview of programs
The max. possible number of programs is illustrated in the chapter “Chart”. The corresponding programs for your appliance can be found on the panel (page 1).

Choose program according to the attached table of programs (page 2). Duration of the program depends on the external conditions in the apartment, temperature and pressure etc.
For hygienic reasons it is recommended to run a high-temperature cycle (e.g. Intensive 65) at least once per month. It will help to keep the appliance clean, fully functional and avoid odours.

Wash cycle

The dishwasher door must be closed and the water tap open.

To pause the program (e.g. if you want to insert an item):
- Press Start/Pause button or open the door with caution (the program pauses) and insert the item/s, (beware of HOT steam).
- Close the door and press the Start/Pause button again to restart the cycle (the program resumes the cycle from where it was interrupted).

To Cancel the program on running:
- Press for 3 seconds the "button. (Water drains for up to 1 minute then the appliance switches off.)

To change the program in progress:
- Press for 3 seconds the "button to cancel the program on running.
- (Water drains for up to 1 minute then the appliance switches off.)
- Press any button to switch on the appliance.
- Select a new program.
- Press the Start/Pause button.

Switching off the appliance. Everything OK...

After the program is completed appliance turns into Standby mode automatically. All indicator lamps switch off.
Exercise caution when opening the door: beware of hot steam.
Unload the appliance starting from the lower rack in order to avoid any residual drips of water falling onto crockery below.

Maintenance and care

9 Filters
Check and clean if necessary

Unscrew microfilter (1), remove it (2) and remove fine sieve (3)...
Rinse under running water...

To Cancel the program on running:
- Press for 3 seconds the "button. (Water drains for up to 1 minute then the appliance switches off.)

To change the program in progress:
- Press for 3 seconds the "button to cancel the program on running.
- (Water drains for up to 1 minute then the appliance switches off.)
- Press any button to switch on the appliance.
- Select a new program.
- Press the Start/Pause button.

Rectifying minor faults yourself...

10 Spray arms
Remove blockages/ deposits.

Unscrew and remove upper arm...
Unscrew and remove lower arm...
Clean spray nozzles under running water (use toothpicks if necessary)...

Insert and screw on upper and lower arms tightly.
If a fault occurs, **before contacting the After-sales Service**, make the following checks to try and remedy the problem. Most faults can be remedied by taking the following courses of action, quickly restoring normal appliance operation.

<table>

  - Be careful – follow recommended detergent dosage.  
  - For combined action tablets see detergent producer’s recommendations. |
| ...tea cups darken and dirt does not disappear after washing in dishwasher | Theine present in black tea. | In case of tea stains, to enhance bleaching add one teaspoon of baking soda together with detergent into detergent dispenser. |
| ...rust marks | Pre-wash program not used. | Salty or acidic food residues can cause rust marks even on stainless steel cutlery. To avoid this, always use the Pre-wash program if the dishes are to be washed later. |
| ...other marks | Rinse aid dosage too low. | In the presence of marks, increase the rinse aid dosage (see page 4, “Adding rinse aid”).  
  - If you use a combined action detergent, try adding more rinse aid. |
| ...streaks | Rinse aid dosage too high. | In the presence of streaks, reduce the rinse aid dosage (see page 4, “Adding rinse aid”).  
  - If you use a combined action detergent which includes rinse aid, do not add any additional rinse aid. |
| ...suds | Unsuitable dosage of detergent/rinse aid. | Only use the amount of detergent/rinse aid required, since excessive amounts can lead to excess suds. |

If, after carrying out the above checks, the fault persists, disconnect the mains plug and turn off the water tap. Contact the After-sales Service (see warranty).  
Before contacting our After-Sales Service, take note of the following:  
- the description of the fault,  
- the appliance type and model,  
- the service code (the number indicated on the adhesive rating plate) inside the door on the right-hand side:

![Service Code Image]
1. Packing
The packaging materials are 100% recyclable and marked with the recycling symbol 🔄.

2. Removing the packaging and inspecting the contents
After unpacking, make sure that the dishwasher is undamaged and that the door closes correctly. If in doubt, contact a qualified technician or your local retailer.

3. Before using the dishwasher for the first time
- The appliance is designed to operate with a minimum ambient temperature of 5°C.
- This dishwasher has been tested by the manufacturer to ensure it functions correctly. Such testing may leave slight drips/water marks which will disappear with the first wash.

4. Energy and water savings
- Do not rinse crockery under running water.
- Always fully load the dishwasher before running it or select the “Half load/ Multizone” option (if available).
- If ecological energy sources are available such as solar panel heating, heat pumps or centralised heating systems, the appliance may be connected to the hot water mains up to a maximum temperature of 60°C. Make sure the water inlet hose is of the correct type (“70°C Max” or “90°C Max”).

5. Child safety
- Keep the packaging materials out of the reach of children.
- Children must not be allowed to play with the dishwasher.
- Store the detergent, rinse aid and salt out of the reach of children.

6. Safety warnings
- The appliance is not intended for use by children or physically or mentally impaired persons, unless adequately supervised by a responsible adult capable of guaranteeing safe use of the appliance.
- Do not operate the appliance in the open air.
- Do not store flammable materials in close proximity to the dishwasher.
- The water in the dishwasher is not potable.
- Do not use solvents inside the dishwasher: risk of explosion!
- Be careful when the door is open: risk of tripping!
- The open dishwasher door can only support the weight of the loaded rack when pulled out. Do not rest objects on the open door or sit or stand on it.
- Sharp items that might cause injury (e.g. knives), must be placed in the cutlery basket with the sharp end facing downwards. Long-handled utensils must be arranged horizontally in the upper rack, with the sharp end facing away from the front of the appliance.

7. Resistance to frost
If the appliance is placed in surroundings exposed to the risk of frost, it must be drained completely. Turn off the water tap, remove the inlet and outlet hoses, and let all the water drain away. Make sure there is at least 1 kg of dissolved regeneration salt in the salt container, to protect the appliance from temperatures of up to -20°C. When the program resumes, an error message may be indicated (see page 8). “F6 E2” - the appliance must remain at an ambient temperature of min. 5°C for at least 24 hours. After eliminating these faults, RESET the appliance (see chapter “What to do if...”).

8. Disposal
- The appliance is manufactured using recyclable materials. If you decide to scrap the dishwasher, it must be disposed of in compliance with local waste disposal regulations. Make it unusable by cutting off the power cord. To prevent situations of potential danger to children (e.g. danger of suffocation), break the lock of the door so that it can no longer be closed.
- This appliance is marked according to the European directive 2002/96/CE on Waste Electrical and Electronic Equipment (WEEE). By ensuring that this appliance is scrapped suitably, you can help prevent potentially damaging consequences for the environment and health. Unsuitable disposal of an appliance of this type as household waste could have detrimental effects on the environment. The symbol ⚠️ on the appliance, or on documentation enclosed with the appliance, indicates that this product must not be treated as household waste, but must be delivered to the nearest collection centre for the recycling of electrical and electronic appliances. Disposal must be carried out in accordance with local environmental regulations for waste disposal. For further information on the treatment, recovery and recycling of this appliance, contact your competent local authority, the collection service for household waste or the shop where you purchased the appliance.

EC Declaration of conformity
This appliance has been designed, constructed and distributed in compliance with the safety requirements of EC Directives: ⚡ 2006/95/CE, 89/336/CE, 93/68/CE and 2002/95/CE (RoHS Directive).

Loading Capacity: 13 place settings.

The guarantee is not applicable if faults are caused by incorrect use of the appliance.

We reserve the right to make technical modifications.
