Machine operation

Additional information (including troubleshooting and service) can be found in the individual chapters of the instructions for use.

**Sort by:**

**Material thickness:** Whenever there is greater load than the dryer can handle, separate laundry according to weight (e.g. dry towels and thin underwear separately).

**Type of material:** Cotton (linen); synthetic textiles (easy care).

**Degree of drying:** Cupboard dry, iron dry etc.

**Do not tumble dry:** Woollens, silk, nylon stockings, delicate embroidery, fabrics with metallic decorations, bulky items such as sleeping bags, etc.

Check that all fastenings are closed and that pockets are empty. Please ensure that there are no cigarette lighters in the wash. Turn laundry inside out.

Pull the door handle.

Place laundry loosely in the drum to achieve equal drying throughout. Then close the door.

Select the drying time required by turning the programme selector knob (for information, refer to programme table).

Select the option required by pressing the corresponding button. The indicator lamp above the relevant button lights up to confirm your selection. A fast blinking led indicates a wrong selection is made (incompatible options). Press the button again to cancel the option.

The drying programme is started by pressing the “Start (Pause)” button. The relevant indicator lamp lights up.

**Changing programme selection:** If the time selected is changed during drying, the dryer stops. The Drying indicator lamps flashes. To operate the new programme, again press the “Start (Pause)” button.

**Interrupting programme:** Avoid to interrupt the drying cycle. For your safety the drying cycle stops automatically if you open the door. To restart, after door opening, close the door and press the “Start (Pause)” button again.

**Warning:** Never stop a tumble dryer before the end of the drying cycle, unless all items are quickly removed and spread out so that the heat is dissipated.

The final part of a tumble dryer cycle occurs without heat (cool down cycle) to ensure that the items are left at a temperature that ensures that the items will not be damaged.

**End of Cycle Anticrease:** Take the laundry out of the dryer. The drying process is complete and the anti-crease phase has been reached (active).

**Anticrease:** If the laundry is not removed at the end of the drying cycle, an automatic anti-crease cycle will operate for maximum 15 min. The drum rotates at regular intervals to prevent the laundry from creasing.

Set the programme selector knob to “Off” “ ”.

**Cleaning the lint filter:** Open door, pull lint filter up and out of machine and open it. Brush lint using a soft brush or your fingertips. Push lint filter firmly back into place.

Please note: Only use additives/plastic items specified as dryer safe and rinse items that have been treated with stain remover thoroughly in plenty of water before drying. Never dry rubber objects or objects stained with vegetable oils in the dryer.

*Test programmes according EN 61121, tested with maximum rated load capacity.

**The drying times refer to average household load sizes, which are spun with textile typical spinning speeds. If the laundry is at the end of the drying cycles still wet, the drying time needs to be set to a longer cycle time.
How to proceed if...

...you want to correctly care for and clean your dryer:

Clean the filter at the end of every cycle.

- Open the door.
- Pull the filter upwards.
- Brush lint using a soft brush or your fingertips.
- Push the filter back into place.

Please de-install once a year the air hose and remove the lint inside.

- Has the correct drying time been selected?
- Was the inserted laundry too wet (washing machine spin speed less than 1000 rpm?)?
- Is the lint filter dirty (filter indicator light on)?
- Is the room temperature too high?
- Are the “End of cycle” and “Anticrease” indicator lamps lighting up? The drying cycle is complete and the laundry can be taken out.
- If the drying result does not meet your expectation, select a longer drying time.

Drying takes too long, laundry is not dry enough.

- Is the plug properly inserted into the mains electricity socket?
- Is there a power failure?
- Has the fuse blown?
- Is the door properly closed?
- Has a drying time been selected?
- Has the “Start (Pause)” button been pressed?
- Has the start delay option been selected?
- Is the dryer overloaded? Please remove a part of the load.

...you want to check the dryer yourself first:

(If your machine is not functioning correctly, please check the following points before phoning for the customer service – also refer to relevant chapter in the instructions for use).

The dryer will not operate (after a power failure, always press the “Start (Pause)” button).

- Is the lint filter clean?
- Is the vent hose blocked?
- Is the outside vent hose adaptor blocked?

AFTER-SALES SERVICE

If the fault is still present once the above checks have been undertaken or should the fault occur for a second time, switch the machine off. Please contact your after-sales service representative (for more information, refer to the warranty manual).

Please have the following details ready when calling your after-sales service representative:

- The nature of the fault.
- The dryer type and model.
- The service code (the number after the word Service on the adhesive rating plate) on the right-hand side when the door is open.
Before using the machine, please also read the instructions for use carefully!

**AWZ 4303 Quick Reference Guide**

**Programme selector knob**
The drying programme is selected by turning this knob.

**“Start (Pause)” button**
The drying programme is started by pressing this button. The indicator lamp flashes during the selection phase and lights up during drying.

**Indicator lamps**
- **Clean Filter**
  - **Clean filter**
    - The indicator lamp lights up when the filter needs cleaning.
    - **Clean the filter at the end of every cycle.**

**Programme sequence**
- **Drum Reverse**
  - 3h
- **Drying**
  - 6h
- **Anticrease**
  - 9h
- **End of Cycle**

**Options**
- **Gentle**
  - Reduces drying intensity (recommended for delicate items).
- **Buzzer**
  - Signals/sounds end of drying cycle.

**Start delay**
- Delays the start of the drying cycle by 3 to 9 hours.
- Press the start delay button and selection appears on the programme sequence. Then press the “**Start (Pause)”** button to confirm the final selection and to start the dryer. During start delay phase, the time selected led is blinking. During countdown, the remaining time is indicated. To cancel the previously set time delay, set the programme selection knob to “Off” “○” or press the start delay button to make the 3 lights off.
