INSTRUCTION FOR USE

THANK YOU FOR PURCHASING A HOTPOINT-ARISTON PRODUCT.
To receive more comprehensive help and support, please register your product at:
www.hotpoint.eu/register

Before using the appliance carefully read Health and Safety guide.

PRODUCT DESCRIPTION

APPLIANCE

1. Upper rack
2. Foldable flaps
3. Upper rack height adjuster
4. Upper spray arm
5. Space Zone
6. Lower rack
7. Cutlery basket
8. Lower spray arm
9. Filter Assembly
10. Salt reservoir
11. Detergent and Rinse Aid dispensers
12. Rating plate
13. Control panel

CONTROL PANEL

1. ON/OFF button
2. PREVIOUS button
3. NEXT button
4. Tablet Detergent (All-in-one) button
5. Zone Wash button
6. Zone Wash indicator light
7. Display
8. Eco program indicator light
9. Start Delay indicator light
10. Program number and remaining time indicator
11. Closed water tap indicator light
12. Rinse Aid refill indicator light
13. Salt refill indicator light
14. Tablet Detergent (All-in-one) indicator light
15. Zone Wash 3D button with indicator light
16. Turbo button with indicator light
17. Extra Dry button with indicator light
18. Start Delay button with indicator light
19. START button with indicator light
FIRST TIME USE
SETTING MENU AND SALT

ADVICE REGARDING THE FIRST TIME USE
After installation, remove the stoppers from the racks and the retaining elastic elements from the upper rack.

SETTING MENU
1. Switch on the appliance by pressing the ON/OFF button.
2. Switch off the appliance by pressing the ON/OFF button.
3. Hold down START button for 5 seconds, until you hear a beep.
4. The display shows the first available setting (letter “A”), followed by its value (for example: 3).
5. Press PREVIOUS/NEXT to scroll the list of the available settings and to see their value (see the below table), then press START if you want to change the value of the displayed setting: its value will start blinking.
6. Use PREVIOUS/NEXT buttons to change the blinking value of the selected settings, then press START to save the new value: it will stop blinking.
7. To change another settings repeat steps 5-6.
8. To exit settings menu - press ON/OFF button.

FILLING THE SALT RESERVOIR
The use of salt prevents the formation of LIMESCALE on the dishes and on the machine’s functional components.
• It is important that the salt reservoir be never empty.
• It is important to set the water hardness.
The salt reservoir is located in the lower part of the dishwasher (see PRODUCT DESCRIPTION) and should be filled when the SALT REFILL indicator light in the control panel is lit.
1. Remove the lower rack and unscrew the reservoir cap (anticlockwise).
2. Only the first time you do this: fill the salt reservoir with water.
3. Position the funnel (see figure) and fill the salt reservoir right up to its edge (approximately 1 kg); it is not unusual for a little water to leak out.
4. Remove the funnel and wipe any salt residue away from the opening.

Make sure the cap is screwed on tightly, so that no detergent can get into the container during the wash program (this could damage the water softener beyond repair).
As soon as this procedure is complete, run a program without loading.
The “Soak” program alone is NOT sufficient.
Residual saline solution or grains of salt can lead to corrosion, irreparably damaging the stainless steel components.
The guarantee is not applicable if faults are caused by such circumstances.
After the salt has been poured into the machine, the SALT REFILL indicator light switches off.
Only use salt that has been specifically designed for dishwashers. If the salt container is not filled, the water softener and the heating element may be damaged as a result.
Whenever you need to add salt, we recommend carrying out the procedure just before the washing cycle is started.

SETTING THE WATER HARDNESS
To allow the water softener to work in a perfect way, it is essential that the water hardness setting is based on the actual water hardness in your house. This information can be obtained from your local water supplier.
The factory setting is “3” for average water hardness.
To change, follow instructions in section "SETTING MENU".

FIRST TIME USE
RINSE AID AND DETERGENT

FILLING THE RINSE AID DISPENSER
Rinse aid makes dish DRYING easier. The rinse aid dispenser A should be filled when the RINSE AID REFILL indicator light in the control panel is lit.

1. Open the dispenser B by pressing and pulling up the tab on the lid.
2. Carefully introduce the rinse aid as far as the maximum (110 ml) reference notch of the filling space - avoid spilling it. If this happens, clean the spill immediately with a dry cloth.
3. Press the lid down until you hear a click to close it.
NEVER pour the rinse aid directly into the tub.

ADJUSTING THE DOSAGE OF RINSE AID
If you are not completely satisfied with the drying results, you can adjust the quantity of rinse aid used.

To change, follow instructions in section “SETTING MENU”.
If the rinse aid level is set to 1, no rinse aid will be supplied. The LOW RINSE AID indicator light will not be lit if you run out of rinse aid.
A maximum of 5 levels can be set according to the dishwasher model.
The factory setting is “4”.
• If you see bluish streaks on the dishes, set a low number (2-3).
• If there are drops of water or limescale marks on the dishes, set a high number (4-5).

FILLING THE DETERGENT DISPENSER
Only use detergent which has been specifically designed for dishwashers.
To achieve the best washing and drying results, the combined use of detergent, rinse aid liquid and refined salt is required.
We recommend using detergents that do not contain phosphates or chlorine, as these products are harmful to the environment.
Good washing results also depend on the correct amount of detergent being used.
Exceeding the stated amount does not result in a more effective wash and increases environmental pollution.
The amount can be adjusted to the soil level. In the case of normally soiled items, use approximately either 35g (powder detergent) or 35ml (liquid detergent) and additional tea spoon of detergent directly inside the tub. If tablets are used, one tablet will be enough.
If the crockery is only lightly soiled or if it has been rinsed with water before being placed in the dishwasher, reduce the amount of detergent used accordingly (minimum 25 g/ml) e.g. skip the powder/gel putted inside the tub.

To open the detergent dispenser press button A. Introduce the detergent into the dry dispenser B only. Place the amount of detergent for pre-washing directly inside the tub.

1. When measuring out the detergent refer to the mentioned earlier information to add the proper quantity.
Inside the dispenser B there are indications to help the detergent dosing.
2. Remove detergent residues from the edges of the dispenser and close the cover until it clicks.
3. Close the lid of the detergent dispenser by pulling it up until the closing device is secured in place.
The detergent dispenser automatically opens up at the right time according to the program.
If all-in-one detergents are used, we recommend using the TABLET DETERGENT button, because it adjusts the program so that the best washing and drying results are always achieved.
If you are using a all-in-one detergents, we recommend that you add salt in any case, especially if the water is hard or very hard (follow the instructions given on the packaging).

</table>

ECO program data is measured under laboratory conditions according to European Standard EN 50242.

*) Not all options can be used simultaneously.

**) The duration of the program shown on the display or in the booklet is an estimate calculated on standard conditions. The actual time may vary depending on many factors such as temperature and pressure of the incoming water, room temperature, amount of detergent, quantity and type of load, load balancing, additional selected options and sensor calibration. The sensor calibration can increase program duration up to 20 min. Standby consumption: Left-on mode consumption: 5 W - Off mode consumption: 0.5 W

**PROGRAMS DESCRIPTION**

**P1 ECO**
Normally soiled crockery. Standard program, the most efficient in terms of its combined energy and water consumption.

**P2 AUTO INTENSIVE**
Automatic program for heavily soiled dishes and pans (not to be used for delicate items).

**P3 AUTO NORMAL**
Automatic program for normally soiled pans and dishes.

**P4 AUTO FAST**
Automatic program for limited quantity of normally soiled crockery. Ensures optimal cleaning performance in shorter time.

**P5 DELICATES**
Program for delicate items, which are more sensitive to high temperatures, for example glasses and cups.

**P6 EXPRESS 30’**
Program to be used for lightly-soiled dishes with no dried food residues.

**P7 GOOD NIGHT**
Suitable for night-time operation of the appliance. Optimum performance ensured.

**P8 SANITIZING**
Normally or heavily soiled crockery, with additional antibacterial wash.

**P9 SOAK**
Crockery to be washed later. No detergent to be used with this program.

**P10 SELF-CLEAN**
Program to be used to perform maintenance of the dishwasher. It cleans the interior of the appliance using hot water.

**Notes:**
Optimum performance levels when using the “Express” program can be achieved by observing the maximum amounts of specified place settings.
To reduce consumption even further, only run the dishwasher when it is full.
OPTIONS AND FUNCTIONS

OPTIONS can be selected directly by pressing the corresponding button (see CONTROL PANEL).

If an option is not compatible with the selected program see PROGRAMS TABLE, the corresponding LED flashes rapidly 3 times and beeps will sound. The option will not be enabled.

TABLET DETERGENT (All-in-one)
This setting allows you to optimize the performance of the program according to the type of detergent used. Press the TABLET DETERGENT button (the indicator light will light up) if you use All-in-one detergents in tablet form (rinse aid, salt and detergent in 1 dose).
If you use powder or liquid detergent, this option should be off.

ZONE WASH
If there are not many dishes to be washed, a half loading may be used in order to save water, electricity and detergent.
Select a compatible program (see “Programs table”), and then press the ZONE WASH button: the symbol of the chosen rack will appear on the display:
(only lower rack selected)
(only upper rack selected)
By default the appliance washes dishes in all racks.
Option is OFF.

ZONE WASH 3D
Thanks to the additional 3D water jets placed on the bottom of the cavity, ZONE WASH 3D option allows to save energy or to increase the washing performance of the dishwasher. It is compatible with Normal and Intensive cycles, and it works with one rack at once.
• 3D ZONE WASH + NORMAL CYCLE: it allows to reduce energy consumption up to 40%.
• 3D ZONE WASH + INTENSIVE CYCLE: it increases the washing performances up to 40%. Ideal for very soiled mixed loads, e.g. pans and saucepans, dishes with heavy encrustation or difficult-to-clean crockery (grater, vegetable mill, dirty cutlery).
How to activate the option:
1. Select a compatible cycle (Normal or Intensive)
2. Press 3D button to activate the option: a basket icon will blink for a few seconds.
3. It is possible to change the selected rack pressing the ZONE WASH button.
Remember to load the crockery in the selected rack only.

WATER TAP CLOSED – Alarm
Flashes when there is no inlet water or water tap is closed.

TURBO
This option can be used to reduce the duration of the main programs while maintaining the same washing and drying performance levels.
Select a compatible program (see “Programs table”), press the TURBO button and the indicator light will switch on. To deselect the option, press the same button again.

EXTRA DRY
To improve the drying of the dishes, after selecting the program, press the EXTRA DRY button and the indicator light comes on.
A higher temperature during the final rinse and an extended drying phase allow for improving drying. To deselect the option, press the same button again. The EXTRA DRY option results in the lengthening of the wash cycle.

START DELAY
The start of the program may be delayed for a period of time between 0:30 and 24 hours.
1. Select the program and any desired options. Press the DELAY button (repeatedly) to delay the start of the program. Adjustable from 0:30 to 24 hours. When 24 hours is setting has been reached, press the START DELAY another time to deactivate the START DELAY function.
2. Press the START button and close the door within 4 sec.: the timer will begin counting down;
3. Once this time has elapsed, the indicator light switches off and the program begins automatically.
The START DELAY function cannot be set once a program has been started.

LIGHT ON THE FRONT
A LED light projected on the floor indicates that the dishwasher is working.
The light stays on during the cycle and switches off at the end of the cycle.
If the delayed start was set, the light goes on for the entire duration of the countdown.
This feature is active by default, but it is possible to deactivate it in the “SETTINGS MENU”.

INTERNAL LIGHTS
When the feature is active the LEDs in the tub are automatically switched on/off as soon as the user open/close the door respectively.
If the door remains opened for more than 10 min, the LEDs in the tub switch off (to turn them on again, the door has to be closed and opened again).
This feature is active by default, but it is possible to deactivate it in the “SETTINGS MENU”.

Hotpoint
DAILY USE

1. CHECK WATER CONNECTION
   Check that the dishwasher is connected to the water supply and that the top is open.

2. LOAD THE RACKS
   (see LOADING THE RACKS)

3. FILLING THE DETERGENT DISPENSER
   (see PROGRAMS TABLE).

4. SWITCH ON THE DISHWASHER
   Open the door and press the ON/OFF button.
   Please note that buttons are deactivated while door is opened more than 3/4 from vertical (closed) position.

5. CHOOSE THE PROGRAM AND CUSTOMISE THE CYCLE
   Select the most appropriate program in accordance with the type of crockery and its soiling level (see PROGRAMS DESCRIPTION).
   The display shows the letter “P” followed by the number of the program (e.g. “P 1”). Pressing the buttons PREVIOUS / NEXT changes the program.
   Select the desired options (see OPTIONS AND FUNCTIONS).

6. START
   Start the wash cycle by pressing START button (led is lit) and closing the door within 4 sec. When the program starts you hear a single beep. If the door was not closed within 4 sec, the alarm sound will be played. In this case, open the door, press START button and close the door again within 4 sec.

7. END OF WASH CYCLE
   The end of the wash cycle is indicated by beeps and the display shows “End”. Open the door and switch off the appliance by pressing the ON/OFF button.
   Wait for a few minutes before removing the crockery - to avoid burns.
   Unload the racks, beginning with the lower one.

The machine will switch off automatically during certain extended periods of inactivity, in order to minimise electricity consumption.
If the crockery is only lightly soiled or if it has been rinsed with water before being placed in the dishwasher, reduce the amount of detergent used accordingly.

MODIFYING A RUNNING PROGRAM
   If a wrong program was selected, it is possible to change it, provided that it has only just begun: open the door (beware of HOT steam!), press and hold the ON/OFF button, the machine will switch off.
   Switch the machine back on using the ON/OFF button and select the new wash cycle and any desired options; start the cycle by pressing the START button and closing the door.

ADDING EXTRA CROCKERY
   Without switching off the machine, open the door (the “:” stop blinking and START led starts blinking) (beware of HOT steam!) and place the crockery inside the dishwasher. Press the START button and close the door within 4 sec., the cycle will resume from the point at which it was interrupted.

ACCIDENTAL INTERRUPTIONS
   If the door is opened during the wash cycle, or if there is a power cut, the cycle stops. To resume the cycle from where it was interrupted, press the START button and close the door.

ADVICE AND TIPS

TIPS
   Before loading the baskets, remove all food residues from the crockery and empty the glasses. You do not need to rinse beforehand under running water.
   Arrange the crockery so that it is held in place firmly and does not tip over; and arrange the containers with the openings facing downwards and the concave/convex parts placed obliquely, thus allowing the water to reach every surface and flow freely.
   Warning: lids, handles, trays and frying pans do not prevent the sprayer arms from rotating.
   Place any small items in the cutlery basket.
   Very soiled dishes and pans should be placed in the lower basket because in this sector the water sprays are stronger and allow a higher washing performance.
   After loading the appliance, make sure that the sprayer arms can rotate freely.

HYGIENE
   To avoid odour and sediment which can be accumulated in the dishwasher please run a high temperature program at least once a month. Use a tea spoon of detergent and run it without the loading to clean your appliance.

UNSUITABLE CROCKERY
   • Wooden crockery and cutlery.
   • Delicate decorated glasses, artistic handicraft and antique crockery. Their decorations are not resistant.
   • Parts in synthetic material which do not withstand high temperatures.
   • Copper and tin crockery.
   • Crockery soiled with ash, wax, lubricating grease or ink.
   The colours of glass decorations and aluminium/silver pieces can change and fade during the washing process. Some types of glass (e.g. crystal objects) can become opaque after a number of wash cycles too.

DAMAGE TO GLASS AND CROCKERY
   • Only use glasses and porcelain guaranteed by the manufacturer as dishwasher safe.
   • Use a delicate detergent suitable for crockery
   • Collect glasses and cutlery from the dishwasher as soon as the wash cycle is over.
LOADING THE RACKS

UPPER RACK
Load delicate and light dishes: glasses, cups, saucers, low salad bowls.
The upper rack has tip-up supports which can be used in a vertical position when arranging tea/ dessert saucers or in a lower position to load bowls and food containers.

FOLDABLE FLAPS WITH ADJUSTABLE POSITION
The side foldable flaps can be positioned at three different heights to optimize the arrangement of crockery inside the rack. 
Wine glasses can be placed safely in the foldable flaps by inserting the stem of each glass into the corresponding slots.
For optimum drying results incline the foldable flaps more. To change the inclination, pull up the foldable flap, slide it slightly and position it as you wish.

ADJUSTING THE HEIGHT OF THE UPPER RACK
The height of the upper rack can be adjusted: high position to place bulky crockery in the lower basket and low position to make the most of the tip-up supports by creating more space upwards and avoid collision with the items loaded into lower rack.
The upper rack is equipped with a Upper Rack height adjuster (see figure), without pressing the levers, lift it up by simply holding the rack sides, as soon as the rack is stable in its upper position.
To restore to the lower position, press the levers A at the sides of the rack and move the basket downwards.
We strongly recommend that you do not adjust the height of the rack when it is loaded.
NEVER raise or lower the basket on one side only.

SLIDING TRAY
The upper rack is fitted with a sliding tray which can be used to hold small crockery and cutlery. For optimum washing performance, avoid positioning bulky crockery directly below the tray. The tray is removable.

LOWER RACK
For pots, lids, plates, salad bowls, cutlery etc. Large plates and lids should ideally be placed at the sides to avoid interferences with the spray arm.
The lower rack has tip-up supports which can be used in a vertical position when arranging plates or in a horizontal position (lower) to load pans and salad bowls easily.
The lower rack has a Space Zone (A), a special pull-out support in the rear of the rack that can be used to support frying pans or baking pans in upright position, thus taking up less space.
In order to use it, just get hold of the coloured grip and pull it upwards (B) while rotating it forward. The supports can slide right and left to fit the size of the crockery.

CUTLERY BASKET
The modular basket can slide to optimise the space inside the lower rack. It is equipped with top grilles for improved cutlery arrangement.

ZONE WASH 3D
Zone Wash 3D uses additional water jets located both: in the lower and upper part of the dishwasher (marked with orange color) to wash more intensively heavily soiled items by increasing water coverage on dishes. Example:
Load pots and casseroles facing lower part of Zone Wash 3D components and activate the Zone Wash 3D option on the panel.

GLASS CARE
Dedicated accessory that allows you to safely store different types of stem glasses in the lower rack.
It enables cleaning & drying results by allowing an optimised and stable positioning of the glasses.
ATTENTION: Always unplug the appliance when cleaning it and when performing maintenance work. Do not use flammable liquids to clean the machine.

CLEANING THE DISHWASHER

Any marks on the inside of the appliance may be removed using a cloth dampened with water and a little vinegar.

The external surfaces of the machine and the control panel can be cleaned using a non-abrasive cloth which has been dampened with water. Do not use solvents or abrasive products.

PREVENTING UNPLEASANT ODOURS

Always keep the door of the appliance ajar in order to avoid moisture from forming and being trapped inside the machine. Clean the seals around the door and detergent dispensers regularly using a damp sponge. This will avoid food becoming trapped in the seals, which is the main cause behind the formation of unpleasant odours.

CHECKING THE WATER SUPPLY HOSE

Check the inlet hose regularly for brittleness and cracks. If damaged, replace it by a new hose available through our After-Sales Service or your specialist dealer. Depending on the hose type:

If the inlet hose has a transparent coating, periodically check if the colour intensifies locally. If yes, the hose may have a leak and should be replaced.

For water stop hoses: check the small safety valve inspection window (see arrow). If it is red, the water stop function was triggered, and the hose must be replaced by a new one.

For unscrewing this hose, press the release button while unscrewing the hose.

CLEANING THE WATER INLET HOSE

If the water hoses are new or have not been used for an extended period of time, let the water run to make sure it is clear and free of impurities before performing the necessary connections. If this precaution is not taken, the water inlet could become blocked and damage the dishwasher.

CLEANING THE FILTER ASSEMBLY

Regularly clean the filter assembly so that the filters do not clog and that the waste water flows away correctly.

The filter assembly consists of three filters which remove food residues from the washing water and then recirculate the water: to obtain the best washing results, you need to keep them clean.

The dishwasher must not be used without filters or if the filter is loose.

After several washes, check the filter assembly and if necessary clean it thoroughly under running water, using a non-metallic brush and following the instructions below:

1. Turn the cylindrical filter A in an anti-clockwise direction and pull it out (Fig 1).
2. Remove the cup filter B by exerting a slight pressure on the side flaps (Fig 2).
3. Slide out the stainless-steel plate filter C (Fig 3).
4. Inspect the trap and remove any food residues. NEVER REMOVE the wash-cycle pump protection (black detail) (Fig 4).

After cleaning the filters, re-place the filter assembly and fix it in position correctly; this is essential for maintaining the efficient operation of the dishwasher.

CLEANING THE SPRAY ARMS

On occasions, food residue may become encrusted onto the spray arms and block the holes used to spray the water. It is therefore recommended that you check the arms from time to time and clean them with a small non-metallic brush.

To remove the upper spray arm, turn the plastic locking ring in an anti-clockwise direction. The upper spray arm should be replaced so that the side with the greater number of holes is facing upwards. The lower spray arm may be removed by pulling it upwards.
INSTALLATION

ATTENTION: If the appliance must be moved at any time, keep it in an upright position; if absolutely necessary, it may be tilted onto its back.

CONNECTING THE WATER SUPPLY
Adaptation of the water supply for installation should only be performed by a qualified technician.
The water inlet and outlet hoses may be positioned towards the right or the left in order to achieve the best possible installation.
Make sure the dishwasher does not bend or squash the hoses.

CONNECTING THE WATER INLET HOSE
• Run the water until it is perfectly clear.
• Screw the inlet hose tightly into position and turn on the tap.
If the inlet hose is not long enough, contact a specialist store or an authorised technician.
The water pressure must be within the values indicated in the Technical Data table - otherwise the dishwasher may be function properly.
Make sure the hose is not bent or compressed.

SPECIFICATIONS FOR THE CONNECTION OF THE WATER SUPPLY HOSE:

<table>
<thead>
<tr>
<th>WATER SUPPLY</th>
<th>cold or hot (max. 60°C)</th>
</tr>
</thead>
<tbody>
<tr>
<td>WATER INTAKE</td>
<td>3/4&quot;</td>
</tr>
<tr>
<td>POWER OF WATER PRESSURE</td>
<td>0.05 ÷ 1 MPa (0.5 ÷ 10 bar)</td>
</tr>
<tr>
<td></td>
<td>7.25 – 145 psi</td>
</tr>
</tbody>
</table>

CONNECTING THE WATER OUTLET HOSE
Connect the outlet hose to a drain duct with a minimum diameter of 2 cm A.
The outlet hose connection must be at a height ranging from 40 to 80 cm from the floor or surface where the dishwasher rests.

Before connecting the water outlet hose to the sink drain, remove the plastic plug B.

ANTI-FLOODING PROTECTION
Anti-flooding protection. To ensure floods do not occur, the dishwasher:
- is provided with a special system which blocks the water supply in the event of anomalies or leaks from inside the appliance.
Some models are also equipped with the supplementary safety device New Aqua Stop, which guarantees anti-flooding protection even in the event of a supply hose rupture.
Under no circumstances should the water inlet hose be cut as it contains live electrical parts.

ELECTRICAL CONNECTION

WARNING: Under no circumstances should the water inlet hose be cut as it contains live electrical parts.
Before inserting the plug into the electrical socket, make sure that:
• The socket is earthed and complies with current regulations;
• The socket can withstand the maximum load of the appliance as shown on the data plate located on the inside of the door (see PRODUCT DESCRIPTION).
• The power supply voltage falls within the values indicated on the data plate on the inside of the door.
• The socket is compatible with the plug of the appliance.
If this is not the case, ask an authorised technician to replace the plug (see AFTER-SALES SERVICE). Do not use extension cables or multiple sockets. Once the appliance has been installed, the power supply cable and the electrical socket should be easily accessible.
The cable should not be bent or compressed.
If the power supply cable is damaged, have it replaced by the manufacturer or its authorised Technical Assistance Service in order to prevent all potential hazards.
The Company shall not be held responsible for any incidents, if these regulations are not observed.

POSITIONING AND LEVELLING
1. Position the dishwasher on a level sturdy floor. If the floor is uneven, the front feet of the appliance may be adjusted until it reaches a horizontal position. If the appliance is levelled correctly, it will be more stable and much less likely to move or cause vibrations and noise while it is operating.
2. Before recessing the dishwasher, stick the adhesive transparent strip under the wooden shelf in order to protect it from any condensation which may form.
3. Place the dishwasher so that its sides or back panel are in contact with the adjacent cabinets or the wall. This appliance can also be recessed under a single worktop.
4. To adjust the height of the rear foot, turn the red hexagonal bushing on the lower central part at the front of the dishwasher using a hexagonal spanner with an opening of 8 mm. Turn the spanner in a clockwise direction to increase the height and in an anticlockwise direction to decrease it.

DIMENSIONS AND CAPACITY:
